

Media Latching

draft-ivov-mmusic-latching

- Presented in Paris (IETF 83)
- Documents Media Latching
 - Informational, Meant to provide a ref for latching and Media HNT
- Discusses security considerations
 - Common Attacks: DoS through port flooding
 - Popular solutions: Restricted latching, SRTP
- Mentions the XMPP RAW-UDP (XEP-0177) use case.
- Are we interested in having this as a WG document?
